4725 WALNUT STREET
BOULDER, CO. U.S.A 80301

303_544_4000
WWW.SPYDER.COM

A skier is shown in a dynamic pose, leaning into a turn on a snowy mountain slope. The skier is wearing a black Spyder ski suit with yellow accents, a white helmet, and yellow-tinted goggles. They are holding red ski poles. The background is a clear, bright blue sky. The text "SPYDER is SKIING ." is overlaid in a bold, yellow, sans-serif font across the middle of the image.

SPYDER *is* SKIING .

INNOVATION THROUGH STRATEGIC PARTNERSHIPS

STRATEGIC PARTNERSHIPS

GORE-TEX® is the ideal solution for all kinds of winter sports; it's durably waterproof, windproof, and highly breathable. You stay warmer when it's cold and drier when you perspire. GORE-TEX® boasts a "Guaranteed to Keep You Dry" promise.

GORE-TEX INFINIUM™ is designed to support even more moments in your active life. Made for when comfort and performance are a priority, this innovative technology offers an upgrade on your current gear. Made for flexibility, functionality, and style for life's adventures, you can now explore more, say yes more, and take every day further.

Pow Pow is the only 4-way stretch fabric from GORE-TEX® on the market. It is exclusive to Spyder and spread throughout our top performance styles.

Avra™'s ultra-thin polyester fibers are extruded and held together by a proprietary removable polymer. These bicomponent fibers can be knit or woven into fabrics on conventional equipment. Once the fabric is made, our removable polymer washes away in hot water, resulting in ribbon-like fibers that are smaller than traditional polyester fibers. The result is a distinctly silky fabric that keeps you drier and more comfortable than ever before.

PrimaLoft® insulation's silky softness, high loft and incredible warmth mimics goose down, but it's engineered with proprietary finish technology to deliver permanent water resistance. PrimaLoft insulation uses fibers just a fraction the diameter of a human hair to form a tight collection of air pockets that trap heat from your body and keep the cold out, providing an excellent warmth-to-weight ratio.

D3O® materials are made using a combination of advanced polymer chemistry and cutting-edge design. The materials are soft and flexible, with no compromise on comfort, but react differently when force is applied. D3O® absorbs and dissipates energy during an impact, reducing the amount of force transmitted to your body compared to standard foams.

REPREVE® – Transforming recycled materials (including plastic bottles), Reprave provides sustainable solutions to brands dedicated to fighting climate change. Compared to making what’s called virgin fiber, using REPREVE® offsets using new petroleum, emitting fewer greenhouse gases and conserving water and energy in the process. That makes a big difference for our future and our industry.

Down is nature’s perfect insulator. Its tiny fibers are lightweight, compressible, and efficiently hold body heat. Down is rated in “power fill.” The higher the number, the greater the quality. The greater the quality, the better the warmth.

X-STATIC® is made by permanently bonding 99.9% metallic silver to the surface of a fiber. It is not a nanotechnology or a complex chemical formula, just silver. The permanent performance of X-STATIC® keeps apparel smelling fresher for longer, even after multiple wear cycles between washings.

Synthetic Down is a 100% Polyester insulation fill that is as lightweight as natural down, is highly breathable and extremely warm... even when wet.
